Trustwave®

Log Management Appliances

For the fastest path to securing the network, Trustwave now offers plug-and-play Log Management Appliances. Simply plug it into the network, configure basic settings through an intuitive interface and immediately gain insight in to what's happening across the network. Log Management Appliances offer:

- Audit-ready reporting on compliance objectives
- Real-time access to security events and logs
- Powerful correlation and analysis
- Rapid search using visual analysis
- Granular permissions support organizational roles
- Turnkey appliance requires no other infrastructure

Trustwave Log Management Appliances work together or stand alone to automate logging and event management. Adding additional appliances allows for easy scaling and can accommodate remote locations that need their own storage, analysis and reporting, while still providing a company-wide view of security.
