

IRAP Assessments in a Changing Threat Landscape

IRAP Services Australia

The Information Security Registered Assessors Program (IRAP) was established by the Australian Signals Directorate (ASD) to assist Australian government agencies and organisations in protecting their information and communications technology (ICT) systems from cyber threats.

Trustwave has ASD certified IRAP Assessors who are well trained and experienced in the ISM. Our IRAP Assessors are responsible for evaluating the security of ICT systems and ensuring that organisations have implemented appropriate security controls to protect their information and ICT systems from cyber threats and that they meet the requirements of the Australian Government Information Security Manual (ISM).

IRAP services include providing advice for and assessments of:

- Cloud services
- Gateways
- Information systems
- System documentation
- Risk mitigation activities

Why Choose Us?

ASD Certified IRAP Assessors: Our IRAP Assessors understand the intricacies of the Information Security Manual (ISM) and Protective Security Policy Framework (PSPF).

End-to-End Assessments: Initial scoping to final reporting, we cover all aspects of the IRAP assessment process.

Proven Expertise and Experience: Extensive experience in assessing and securing government and private sector organisations.
